

417 *Refine* ACADEMY

TRAINING OVERVIEW

PRESENTED BY 417 REFINE, LLC

Course Director: Tiffany Bracamonte, MSN, FNP-BC

417 *Refine* ACADEMY

WELCOME!

So, you want to become a certified aesthetic injector?
The aesthetic industry is booming and is a great field to dive into.
We're here to help! We're excited to help you kick start your dream
of becoming an aesthetic injector.

Tiffany Bracamonte MSN, FNP-BC is the founder of 417 Refine, LLC, 417 Refine Academy, and 417 Refine Mentorship and Affiliate Program. Tiffany is a Nurse Practitioner with over 13 years of experience. She spent 10 years in a Level I Emergency Trauma Center before transitioning into the field of Medical Aesthetics and Wellness and creating the 417 Refine entities.

Our intro injector training provides you with everything that you need to know and learn to start as a novice aesthetic injector. This course covers basic neurotoxin injections (forehead lines, frown lines, crows feet, and lip flip), dermal filler injections (lips and perioral lines), and business aspects. Our training starts with the didactic portion, and then we dive right into the clinical portion where you have the opportunity to have hands-on experience with up to two neurotoxin models and two dermal filler models. These models are just for you with direct supervision from your trainer to have adequate hands-on experience. You will also have the opportunity to learn about our mentorship and affiliation program if so desired.

WHAT YOU'LL GET

Upon successful completion of this training, you will have the knowledge and experience to begin your career as a nurse injector. Our course utilizes scientifically supported education modules as well as live, hands-on training to deliver the tools needed for success. Unlike other injector training offerings, we take our time to thoroughly explain the ins and outs, the whys behind the do's, and all of the hidden secrets of the highly sought after world of medical aesthetics.

Even better? The training doesn't stop after receiving this certification! You'll also gain access to our private Facebook group for personal access to master injectors, as well as a forum for networking and peer support.

You will receive a certificate of completion after successfully completing the training course. You will have the opportunity to join our Mentorship + Affiliate Program, which will allow you to kick start your own business under the leadership and business model of 417 Refine, LLC.

We look forward to meeting you and being a part of your professional development!

TRAINING OBJECTIVES

1. History: learn why aging occurs, where injectables come in, as well as the mechanism of action of injectables.
2. Neurotoxin and Dermal Fillers: Learn indications, contraindications, pharmacology, intro rheology, pathophysiology, and more
3. Safety: review guidelines, side effects, adverse reactions, risk, choosing the right client, and the management thereof
4. Medication Administration: determine accurate and appropriate dosing, preparation, and administration of client specific medications
5. Business Model: Receive step by step instruction on what you need to start your own practice, or to set yourself up for success to join a successful aesthetic practice
6. Anatomy: Review of muscular, vascular, as well as global anatomy.
7. Patient evaluation: Medical aesthetic specific assessment pre, intra, + post procedure
8. Procedure: Instruction on how to perform basic procedures including neurotoxin for forehead lines, frown lines, crow's feet, lip flip, and dermal filler for lip augmentation and perioral lines as well as aseptic technique procedures
9. Professionalism: Learn aesthetic bedside manner, client comfort, verbiage, client-injector relationships, dealing with the difficult client, when to say no, setting clear expectations, boundaries, and more
10. Complications: Learn best practices to avoid complications and how to manage in the event they occur

NEXT STEPS

If you're interested in attending our training, we would love to have you! All you need to do is complete the steps below. Once complete, you will then receive further instructions and information via email.

Attendee Registration Instructions:

1. Fill out our registration form in entirety at:
<https://form.jotform.com/212968793193168>
2. Email proof of license in good standing to 417refine@gmail.com, which can be found at:
<https://www.nursys.com/LQC/LQCSearch.aspx>
3. Once these two steps are complete, please email us stating which training date you would like to attend. We will then send you an invoice via email to complete payment. Our current Training Investment is \$1,500. *Please be advised, your seat is held when payment is received in FULL.* Payments via invoice may be in the form of credit card (2.9% fee) or bank transfer (1%) fee. We also accept Zelle or check.
4. You will receive further instructions via email after steps 1-3 are completed including confirmation of registration and payment, tentative training schedule, information for models, and address of lecture training day will be held at 417 Refine in Springfield, MO. Please be prepared to stay for the entirety of your training or certification may be withheld. Students will need to be prepared with two models. It is ideal that your two models be prepared to receive both neurotoxin and dermal filler injections, however they may choose to receive just one. If this is the case, additional models may be obtained to equal two neurotoxin procedures and two dermal filler per injector. More information will be provided once registration is confirmed.

Registration fee is non-refundable and required in full at time of registration.

Please contact Tiffany Bracamonte, NP with any questions: 417refine@gmail.com

IN PREPARATION FOR CLINICAL

Training Models:

- We ask that you have model(s) who are eager and willing to be your model during the hands-on clinical day. Each student may have two full neurotoxin injection model(s) and one full dermal filler. A minimum of one tox and one filler is required for certification. They must be willing to sign a photo release and be flexible on their appt time. Once you have your models, please email their full name, DOB, email, phone number, address, and any allergies to medication to 417refine@gmail.com no later than two weeks prior to training weekend.
- Your model should not have had any neurotoxin treatments within the past three months, has never had lip filler ideally, and is ready to receive both at the training by you. This will benefit your learning experience.
- If you have trouble finding models, please let us know as soon as possible so that we may start assisting in recruiting for you, although we can not guarantee this. Providing models for your training is ultimately the student's responsibility.
- Your models will be contacted with an appointment time once the clinical day schedule is confirmed. This will be done closer to the training weekend. We ask again that your models be flexible on the day of training regarding their appointment time. For models, neurotoxin will be \$7/unit and dermal filler will be \$250 for half of a syringe. We will only be using 1/2 syringes for training.
- Please instruct your models to look for an email from us with their appointment time and direction to complete our forms and waivers. They will also have access to review our pre and post procedure instructions which they should fully review.
- They should be prepared for expected potential side effects of injections including but not limited to: minor swelling and bruising. If they have any important events coming up in the two weeks following, they are not a good candidate to be a model for training. These side effects should resolve within two weeks for most.
- Development of a cold sore is possible after receiving lip injections. If your model has a history of cold sores and would like to start a prophylactic antiviral, please let us know via email so this prescription can be sent in prior to the training weekend. This may help prevent a cold sore from developing and needs to be started 72 hrs prior.

You will be expected to stay for the entirety of the training on both days.
Failing to do so may prevent you from obtaining your proof of training certificate.

You will receive a certificate of completion at the conclusion of the training.

As always, please reach out if there are ANY further questions or clarification.
We look forward to learning with you!
